

Field Service Tanks

(Custom built tanks available to your specifications.)

Model 65LL

(115 gallon capacity)

Made to fit under most cross-mounted tool boxes, cutouts made for short box pickups. Available in white, black or red.

Model 5710

(55 gallon capacity)

This pickup auxiliary tank gives you just enough extra fuel for those long trips. Available in white, black or red. (61" long, 19" high, 11" deep)

Model 200 PI

(188 gallon capacity)

Designed for transferring fuel to remote or heavy equipment in the bed of a pickup truck. Available with cutouts to fit around wheel wells for short box pickups. All units are fully baffled and double compartment units have double dividers vented to the outside to guarantee against inter fuel mix. Available in white, black, or red. (61" long, 31" deep, 23" high)

Model 200TI

(With side mount tool boxes)

(188 gallon capacity)

Auxiliary fuel tank with top mount toolbox, standard 2" bung for fuel pump with top gas filler opening. Galvanized steel locking latches. All units available with cutouts for short box pickups. (61" long, 31" deep, 29" high)
